Community Problem #2  
Graphing Linear Functions

One of the most popular races in town is the “Running of the Boots”. This year marked the 20<sup>th</sup> Running of the Boots race in Sitka. The race takes place every fall to celebrate the end of the tourist season. The race involves runners of all ages running through the downtown main street wearing rubber boots. Create a table and graph to show the relationship between number runners to boots.

---

**Sample Work –**

# of racers (Independent)	# of boots (Dependent)
0	0
1	2
2	4
3	6
4	8
5	10
6	12
